DENOMINATION OF ORIGIN

2019

# *Nuestra historia*

Borned in A Coruña, but with half heart in Ourense, our story is written from the family legacy which began between what today are the Denominations of Origin of Ribeiro and Monterrei, where our grandfather elaborated the most recognized wine of the region with innate wine knowledge. Today, with great tenacity, we try to recover those vineyards where we played when we were children.

Visionary. Charismatic. Fighter. Observer. People say that he made the best wine of the region. Today, in some of those lands, there are now hundred-year-old Garnacha vines, a memory of how began this story.

Our grandparents story is the one of a precursor at that time and his sweet wife that fought together for their lands, for their vineyards ... for a dream.

For almost 9 years, we recovered that family legacy by betting on a mission, an idea, which was to take the Galician wines to the last possible corner of the world ... and that has been our journey.

Our goals? Preserve the innate and excellent features of our native varieties and achieve the best enological experience to reach any consumer. Selecting each grape from the vineyard and controlling every part of the process by our qualified staff, we are pleased to introduce our fifth vintage after having achieved awards at international contests as Decanter, CWSA, Sakura Adwards .... and be present in more than 15 countries with elegant wines, direct, balanced and, above all, that they do not lose the innate organoleptic qualities of any of our varieties.
